

Jim Bade's BMW R1100/R1150 Series Maintenance Companion DVD

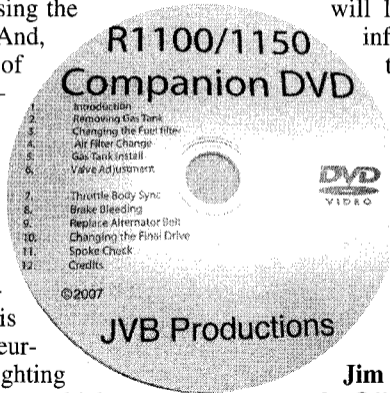

FOLLOWING ON THE heels of his R1200 Series Maintenance DVD (reviewed in the September issue), Jim Bade has released a companion DVD designed to help BMW owners with R1100 and R1150 Series Oilheads tackle routine service. This DVD covers:

1. Removing and reinstalling the gastank
2. Changing the fuel filter
3. Replacing the air filter
4. Valve adjustment
5. Synchronizing the throttle bodies
7. Bleeding the brakes
8. Replacing the alternator belt
9. Changing the final drive fluid
10. Checking wheel spokes

As with the previous R1200 Edition,

finding the specific information required is simple using the numbered chapters. And, as before, a wealth of information is covered which could save an owner thousands of dollars in maintenance costs over the useful life of the motorcycle.

However, the production values of this DVD are rather amateurish, with mediocre lighting and background banter which were not so abundant on the R1200 DVD.

Nonetheless, the typical BMW owner will likely find the functional information contained within the DVD outweighs its basic production values, and can use it to gain a much more thorough understanding of the motorcycle than is available from reading manuals alone. The DVD is \$20 plus \$3 for shipping within the US.
